

Bar Code Scanning!

The MS830 rugged handheld scanner from Unitech delivers performance features to ensure maximum productivity. From the production line to the back office, the MS830 is an ideal choice for various applications such as sample tracking and P.O.S.

Reliable Performance

Featuring a built-in laser bar code scan engine and reliable decoding, the MS830 provides fast & accurate scanning performance.

Configuring the MS830 is fast and easy, thereby reducing start up time and expense. To further reduce cost, the MS830 has an interchangeable cable design, which allows users to change interfaces by simply replacing a cable.

Rugged Design

To minimize down time, the rugged MS830 is designed to meet 1.5 meter drop tests. The ESD protection guarantees the MS830 can withstand 8KV Contact and 12KV Air electro-static discharge.

User Friendly

The rugged, yet lightweight ergonomic design, makes the MS830 a user-friendly scanner. The gun design helps users to comfortably operate the MS830 during hand-held bar code reading.

Features:

- ❑ Laser bar code scan engine
- ❑ Fast reading & decoding of all major linear bar codes
- ❑ Clear adjustable audible beeps & visible LED ensures positive feedback to user
- ❑ Interchangeable cable design
- ❑ Robust design withstands 1.5m drop onto concrete
